## **PROBLEMS/ SOLUTIONS**

P=Problems S=Solutions

**P1-** Client services are no longer practiced. Whenever a problem exists, contacting live human support via telephone or even online live chat does nothing but send creators an email informing them that, due to COVID from two years ago, they are receiving more calls and are unable to attend to them at the moment, and that they will contact them within 24 to 48 hours. Due to a lack of willingness to waste so much time on the issue, the creators will give up and accept the loss. Everyone's time is money and the best way to move forward seems to be the main Complaint.

**S1-** Lemon Social support staff is available through live chat and phone line seven days a week, including Saturdays and Sundays. Holidays, no issue. At Lemon Social, someone is always present for those who are most important. The Subscribers and our Creators

**P2-** The platforms provide little tools, and upgrades or updates appear to have ceased. If available at all, filters for beautifying such as makeup and backgrounds incur an additional fee.

**S2-** Lemon Social understands that waking up in the morning, grabbing that cup of coffee and The need to jump online sometimes is a must. Yet no one will add the most important filters that are available to the creators. Putting on make-up. Lipstick, eyeliner, foundation, and so on. At no extra cost to our creators, we have added it all at no extra cost to our creators. Is the room a mess? No worries, we have backgrounds as well. That is why we are the best option.

**P3-** The price of being a content creator has increased significantly. Creators pay the platforms between 20% and 35% of their earnings. Included are all creators on competing platforms. After deducting the costs of technology, marketing, and promotion for their works, they are fortunate to obtain 40% of their actual earnings.Quality of livestreams and video chat are deteriorating because platforms are unwilling to invest in enhancements that could generate additional Revenue.

**S3-** Lemon Social offers two types of subscriptions. Option 1: Pay \$199 monthly and retain 95% of revenue. Option 2: Make no monthly payment and retain 85% of your revenue. In addition, The majority of platforms permit 5% referrals for up to one year. We raised the bar making it for life. We have incorporated high quality resolutions for our live streaming and video chats utilizing the greatest technology on the market while modifying all areas to the ideal levels, allowing us to charge less and provide greater quality to the producers, allowing them to earn more in the long run.

**P4-** Creators spend more time online promoting their work, which inhibits the generation of fresh material. When creators are expected to market and promote their own work, they spend a considerable amount of time online searching for potential new customers. This makes them more susceptible to cybercriminals. They have set themselves up for failure by leaving a digital Footprint.

**S4-** On our platform, Lemon Social has built a marketing agency geared to help those in need sell their creations and connect with others. This will enable them to create their area of expertise. In addition, by introducing blockchain technology as an option, we have now opened the door not only to securing their work in the form of NFTS if they choose to do so, but also to the 83 million blockchain users who search daily for new collections in the form of NFTS. The platform's ability to mint non-fungible tokens aids in advertising and promotion. We can protect the integrity of the work and the artists more effectively.

**P5-** Due to the platforms' influence over creators' finances, creators are frequently compelled to reduce the quality and quantity of their work. In most cases because of the platforms' laws and limitations, they are frequently not compensated or unable to cover the additional expenditures associated with advertising their creations.

**S5-** We have created the optimal combination with our debit and credit card providers, as well as our wallets, so that creators can not only withdraw funds from their accounts directly into their own banks, but also exchange them for Lemon Social digital tokens and add them to for their own digital wallets of their choice. They can accept cryptocurrency, exchange it for others within themselves and other creators or mint NFTs with it. Clients can buy products with cryptocurrency or transfer funds to a family member. This gives individuals complete control over their prices and subscriptions, allowing them to withdraw at any time provided they have sufficient money in their wallets.

## **CONCLUSION**

Lemon Social is the first platform for content creators to ever offer all services for a low monthly subscription fee of \$199 and 5% of their overall income, and for those who are new, only 15% of total profits, to celebrities, artists, and professional content creators. We stand out because subscribers as well as artists can make money. We are the first platform to deduct the referral fee from the platform's profits rather than charging creators when someone recommends them to the platform. All other platforms tax the creators directly, but we let you make an endless profit from the invites you send, not just for the first year but for the rest of your life.

As an added bonus, we have created Lemonsocial.tv to assist you in promoting your content and an inclusive agency that educates new creators and marketers along with blockchain enthusiasts about Non fungible tokens. Our creators and subscribers have access to using credit cards or digital currency, and we are the first to add minting and selling NFTs as well as access to create and sell links to the metaverse right from your own account on Lemonsocial.com.
